What is included

ACG Premium Bundle

Your private chart page, calculated astrology data, and personal astrocartography app are delivered together.

- Full natal chart data
- Asteroids and transit data
- AI-ready YAML and consultation prompt
- Private chart page

Personal ACG app

Your planetary angular lines are calculated from your confirmed birth time and stored inside START-ACG.html.

- No YAML paste required
- Downloaded and online versions
- Career and relationship presets

Accuracy and privacy

An exact birth time is required. Birth data and calculated lines stay inside the app; only background map tiles use the internet.

- Exact birth time required
- Precalculated personal lines
- Only map tiles use the internet

Using your ACG Bundle

1. Save your private chart page

Save the private URL issued after activation, then download your data archive and ACG app.

2. Open the ACG app

Open the online app from your private page, or extract the ZIP and open START-ACG.html.

3. Explore ACG

Choose a theme and explore your lines. Only map tiles use the internet; your birth YAML is not sent.

Ask an AI

Use the included YAML and prompt with an AI. Ask it to interpret the calculated values without recalculating.

- Strongest natal themes
- ACG lines for career or relationships
- The next month from transits

FAQ and important notes

Can I use the code more than once?

The code is marked as used after the ZIP is created successfully. Keep the downloaded ZIP in a safe place.

Why does the map need internet access?

Planetary-line data stays local. Only background map tiles are downloaded from the map provider.

Can I use an estimated birth time?

The ACG Bundle requires an accurate confirmed time because the lines can move substantially across the world.

Is this medical or financial advice?

No. This product is for personal reflection and entertainment and does not replace professional advice.

Features may change during beta. Keep your ZIP and contact support if needed.
